NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with generally accepted accounting principles and laws and regulations in force in the Grand Duchy of Luxembourg applicable to undertakings for collective investment in transferable securities.

a) Valuation of Assets

In general, the value of each fund assets is determined as follows:

- (i) Cash in hand or on deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received are valued at full value, adjusted for any appropriate discount or premium we may apply based on our assessments of any circumstances that make the full payment unlikely.
- (ii) Transferable securities and money market instrument that are listed or traded on an official stock exchange or other regulated market are generally valued at the most recent price quoted on the market where they are principally traded.
- (iii) Non-listed securities, or listed securities for which the price determined according to the above methods not representative of fair market value are valued in good faith at a prudent estimate of their sales price.
- (iv) Derivatives that are traded on stock exchanges or regulated markets are valued at the settlement price most recently quoted for a derivative's primary market(s), adjusted if necessary to allow for settlement on a different day if current-day settlement is not possible.

Derivatives that are not traded on stock exchanges or regulated markets are valued at liquidation value, according to policies applied consistently for each given type of derivative.
- (v) Shares or units of UCITS or UCIs are valued at the most recent Net Asset Value reported by the UCITS/UCI, or, if the most recent Net Asset Value does not reflect current market realities, at fair value.
- (vi) Credit default swaps and contracts for difference are valued according to valuation principles set by the Board of Directors of the SICAV, based on mark-to-market practice using standard market practice.
- (vii) All other swaps are valued at market value, with reference to the applicable rate curve.
- (viii) Currencies are valued at the latest mid-market foreign exchange rate (applies to currencies held as assets, to hedging positions, and when translating values of securities denominated in other currencies into the base currency of the Fund).
- (ix) All other assets are valued in good faith at a prudent estimate of their sales price.

All valuation methodologies are established by the Board. For any asset, the Board of Directors of the SICAV can choose a different valuation method if it believes that method may result in a fairer valuation. For more information on our asset valuation methods, see the articles.

Notes to the Financial Statements (continued) as at 30 June 2025

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

All assets which are valued in a currency other than the currency in which shares of the relevant fund are denominated will be converted into the relevant currency at the latest median foreign exchange rate.

(x) Timing of asset pricing. The fund use snapshot pricing, meaning that the prices used for valuation are as of a specific point during the trading day rather than end-of-day values. Changes in value between the time of pricing and the closure of the relevant market will therefore not normally be reflected in the Net Asset Value.

(xi) The Management Company valued the following security on the basis of the probable realizable value Hesalight A/S 7.00% 12.12.19 at EUR 0.00 per share, which represents 0.00% of the Net Asset of Nordic Corporate Bond on 30 June 2025.

(xii) The Management Company valued the following security on the basis of the probable realizable value Neon Capital Ltd. 0% 06.01.28 at JPY 93.99 per share, which represents 0.04% of the Net Asset of Emerging Markets Debt Hard Currency on 30 June 2025.

(xiii) The Management Company valued the following security NMC Health Plc at zero on 27 March 2020 based on the uncertainty of the outcome of ongoing investigations into company accounts and its debt position. The security is held in Emerging Markets Sustainable Future, Global Index and Global Index Restricted.

(xiv) As regards to the Russian securities held in the funds including the funds under liquidation – Russia, Eastern Europe and Global Emerging Markets Small Cap – the Management Company has decided to evaluate the prices of all Russian Securities in the funds by applying a 100% reduction, with the exception of holdings in Nebius Group NV (with value USD 94,070 for Eastern Europe and USD 478,794 for Russia). The security is priced based on its potential availability to be traded in the market again. The latest estimated prices reflect a fairer value of the securities in the NAV estimation.

(xv) The Management Company valued the following security on the basis of the probable realizable value CONTRA ABIOMED, Inc. at zero per share, which represents 0.00% of the Net Asset of Global Index, Global Index Restricted and Global Portfolio Solution – Balanced on 30 June 2025.

There may be changes in the tax laws or interpretations of such laws of various jurisdictions in which the funds operate or invest in. As a result the fund can become subject to additional or unseen taxation as well as to changes in taxation treaties between the countries in which the fund operates or invests in. These changes may affect adversely the ability to efficiently realise income or capital gains. Liabilities in respect of taxes payable on unrealised capital gains on investments in certain countries are accrued in the Net Asset Value on a daily basis.

i) Swing Pricing

On business days when trading in a fund's shares will require net purchases or sales of portfolio investments exceeding a certain percentage of the fund's net assets (as set by the Management Company and approved by the SICAV), a fund's Net Asset Value may be adjusted.

This adjustment reflects an assessment of the overall costs incurred in buying and selling investments to satisfy subscriptions or redemptions of shares (understanding that a fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

Swing pricing is intended to reduce the impact of these costs on Shareholders who are not trading their shares at that time.

In general, the Net Asset Value will be adjusted upward when there is strong demand to subscribe for fund shares and downward when there is strong demand to redeem fund shares. Swing pricing adjustments are automatic and are applied systematically by computation.

Thresholds and adjustment percentages can vary by fund, but the adjustment will not be larger than 2% of Net Asset Value for all share classes within a fund. In extraordinary situations the Management Company can raise this limit to protect the interests of Shareholders.

The Net Asset Value for all the funds in the SICAV have swung during the financial period with the exception of the following funds:

Aktiv Förmögenhetsförvaltning, Eastern Europe (in liquidation), Europe Long-Short Equity Factors, Global Emerging Markets Small Cap (in liquidation), Global Portfolio Solution - Balanced, Global Portfolio Solution - Defensive, Global Portfolio Solution - Opportunity, Russia (in liquidation) and Sverige Småbolag.

j) Realised profit / loss on Contracts For Difference ("CFDs")

NOTE 3 – MANAGEMENT FEES AND OPERATING AND ADMINISTRATIVE EXPENSES

Management fees

The Management Company receives the management fee from the net assets of each share class, payable quarterly in arrears, which in turn pays the Investment Manager and the distributors. The actual annual rates applied on 30 June 2025 are listed in the table below.

Operating and Administrative Expenses

The SICAV pays the Management Company operating and administrative expenses (the "Operating and Administrative Expenses") as determined in respect of each fund and/or share class in the relevant fund description in the SICAV Prospectus. The Operating and Administrative Expenses are fixed, and the actual annual rates applied on 30 June 2025 are listed in the table below.

The Management Company shall bear the excess in actual expenses to any Operating and Administrative Expenses charged to the fund and/or share class. On the other hand the Management Company is entitled to retain any amount of the Operating and Administrative Expenses charged to the fund and/or share class, which exceeds the actual related expenses incurred by the respective fund and/or share class.

Under current law and practice, the SICAV is liable, to an annual subscription tax of 0.05% except those funds or share classes, which may benefit from the lower rate of 0.01% as more fully described in article 174 of the 2010 Law. No such tax is due on the portion of assets of the fund invested in other Luxembourg UCITS or UCIs (if any) provided that such assets have already been subject to the subscription tax. This tax is paid by the Management Company out of the Operating and Administrative Expenses.

The Operating and Administrative Expenses covers the administration and safekeeping of assets and in addition other ongoing operating and administrative expenses as follows:

- the Luxembourg tax d'abonnement;
- fees and expenses of the depositary, including charges for local correspondents that exceed the depositary's responsibility;
- fees of the central administration and registrar agent;

If the fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same Management Company or by any other company to which the Management Company is linked by common management or control or by a substantial direct or indirect holding, that Management Company or other company may not charge subscription or redemption fees on account of the Fund's investment in the units of other UCITS and/or other UCI.

In respect of a fund's investments in UCITS and other UCIs whether managed or not by the Management Company or any other company linked to the Management Company, the total management fee (excluding any performance fee, if any, and taking into account net amount of possible rebates from the other UCITS and/or UCIs in which the fund invests in) charged to such fund itself and the other UCITS and/or other UCIs concerned are outlined in the table below:

n) Transactions with the related parties and cross-investments:

During the year, there have been no significant transactions which were outside the ordinary course of business or which were not on normal commercial terms.

Some of the Funds use cross investment techniques, meaning that the Funds invest into other Funds within Company's umbrella structure. The combined Statement of Net Assets and the combined Statement of Operations and Charges in Net Assets have not been adjusted to remove the impact of the cross investments. The commissions on subscriptions and redemptions, as well as management fees, were not applied to the assets of the fund that has cross-invested into other funds.

NOTE 4 – PERFORMANCE FEES

The Investment Manager is also entitled to receive a performance fee from Europe Long-Short Equity Factors, Global Alternative Opportunities and Global Tactical Allocation calculated, accrued and locked on each valuation day and paid annually in arrears on or after the last valuation day in each financial year. If a performance fee is payable in relation to a relevant share class, the performance fee shall be an amount equal to 20% of the Outperformance for Europe Long-Short Equity Factors and Global Alternative Opportunities and 10% of the Outperformance for Global Tactical Allocation.

The performance fee methodology is in accordance with CSSF Circular 20/764 regarding guidelines on performance fees in UCITS, ESMA Guidelines on performance fees in UCITS and ESMA "Questions and Answers" regarding the application of the UCITS Directive.

A performance fee is charged when a share class of the fund outperforms its reference benchmark for performance fee calculation, a measure of relevant market performance, as shown below:

DANSKE INVEST SICAV

Notes to the Financial Statements (continued) as at 30 June 2025

NOTE 4 – PERFORMANCE FEES (continued)

Share Class Currency	Reference Benchmark For Performance Fee Calculation	Bloomberg ticker	Benchmark administrator ESMA registered
CHF	Swiss Average Rate Overnight	SSARON	Yes
DKK	Tomorrow/Next Interest Rate	DETNT/N	Yes
EUR	Euro short-term rate	ESTRON	N/A
NOK	Norwegian Overnight Weighted Average Rate	NOWA	N/A
SEK	Stockholm Interbank Offered Rate Tomorrow/Next	STIB1D	No
USD	US Federal Funds effective rate	FEDL01	No

At the beginning of the first business day of a calculation period, and as soon as a performance fee is crystallised at the end of the calculation period, the accrued fee is set to zero and the respective values of the relevant NAV and the reference benchmark for performance fee calculation are defined as the zero point for the period's performance fee calculations.

On every day that is a business day for a fund, the performance of the applicable reference benchmark for performance fee calculation is subtracted from the share class performance. A positive result indicates outperformance, a negative number underperformance.

The results from these calculations accrue over the calculation period. When the accruals result in net outperformance for the period to date, they are factored into NAV. When the accruals result in net underperformance for the period to date, no performance fee is factored into NAV, but the accrual calculations continue, meaning that no performance fee can be earned during that calculation period until the accrued underperformance is overcome.

The performance fee is payable only if the performance of the share class exceeds the NAV previously attained when a performance fee was crystallised at the end of the calculation period, or if it exceeds the NAV at inception, if no performance fee has been paid.

This above-mentioned NAV, referred as high watermark, is adjusted for the movements in the reference benchmark for performance fee calculation and takes into account the subscriptions, redemptions or distributions effects. The calculation method is designed to account for the actual investment performance of the fund and not for NAV increases resulting from new subscriptions. Furthermore, swing pricing or other adjustments intended to mitigate the effects of transaction volumes or costs are not counted in the performance fee calculation.

In cases where the value for the reference benchmark for performance fee calculation is negative, its value is defined as zero for the purposes of the calculation of the performance fee.

Because different share classes of a fund may have different NAVs, the actual performance fees paid may vary by share class. As at 30 June 2025, performance fee applied to Europe Long-Short Equity Factors, Global Alternative Opportunities and Global Tactical Allocation, as shown below:
